WIRELESS MINI-DI DUO

Introduction

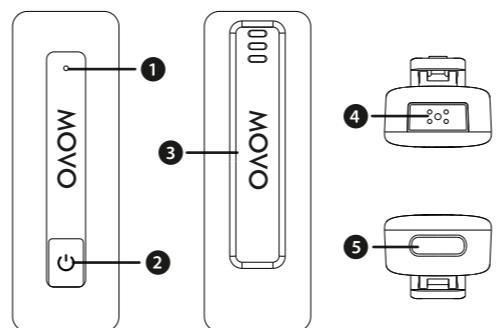

The Movo Wireless Mini-DI DUO is an ultracompact and portable 2.4GHz dual microphone wireless system designed for recording with iPhone and Apple lightning iOS devices. With automatic pairing and selectable noise cancellation, the Wireless Mini-DI is ideal for livestreaming, vlogging, interviews, smartphone video shoots and more.

Cautions

1. Avoid exposing devices to excess heat or placing them on surfaces that produce heat.
2. Be mindful of dust and moisture when using and storing the devices.
3. For optimal sound pickup, ensure that the microphone head is not obstructed or covered.

Product Structure

Wireless Mini-TX

2

3

1. Status indicator

Status	Indicator
Unpaired	Blinks blue and red alternately
Successfully paired	Solid blue light
Mute ON	Blinks blue quickly (every 1 second)
Low battery	Blinks red every 5 seconds
Noise Cancellation ON	Blinks blue slowly (every 2.5 seconds)
Noise Cancellation OFF	Solid blue light
Charging	Solid red light
Fully charged	Light off

Note: If charging the unit when it is ON, the indicator will display the current working status instead of charging status.

2. Power/Mute button

- Long press the button for 2 seconds to turn on/off the unit.
- Short press the button to mute/unmute the microphone.
- Double click the button to turn on/off noise cancellation

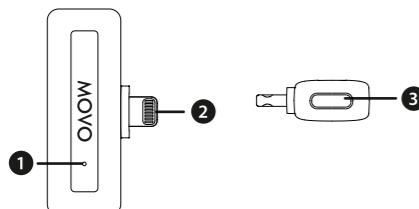

3. Belt clip

4. Built-in mic

5. USB-C charging port

Use the supplied USB-C charging cable to charge the unit.

Wireless Mini-DI-RX

1. Status indicator

Status	Indicator
Unpaired	Flashing blue light
Successfully paired	Solid blue light

2. Lightning connector

Designed to connect and record with iPhones and other Apple lightning iOS devices.

3. USB-C charging port

When the Wireless Mini-DI-RX is plugged into an external device, the external device can be charged via this charging port.

Note: iPad and iPhone can be charged through this port, which also supports up to 3A fast charging.

How to Use

1. Press and hold the power button for 2 seconds to turn on the transmitters.
2. Plug the Wireless Mini-DI-RX into an iOS device or the Wireless Mini-UC-RX into a USB-C device.
3. Transmitters and receiver will be successfully paired within 10 seconds.
4. You are ready to record.

Note: The signal from 2.4Ghz wireless systems can be easily attenuated. Please try to avoid obstacles, such as walls and buildings, and avoid close proximity to other devices with 2.4GHz signal, such as high-power wifi antennas, radios, etc.

Features

- 2.4GHz dual-channel wireless microphone system
- Ultracompact and portable
- MFi-certified Apple lightning/iOS compatibility.
- Omnidirectional built-in mic offers 360 degree pickup.
- Selectable noise cancellation
- Automatic pairing
- Plug and play functionality
- USB-C charging port on receiver charges external devices when connected
- Transmitter's built-in rechargeable battery lasts up to 10-hours
