## USER MANUAL

---

## **Thank you for choosing PROLIGHTS**

Please note that every PROLIGHTS product has been designed in Italy to meet quality and performance requirements for professionals and designed and manufactured for the use and application as shown in this document.

Any other use, if not expressly indicated, could compromise the good condition/operation of the product and/or be a source of danger.

This product is meant for professional use. Therefore, commercial use of this equipment is subject to the respectively applicable national accident prevention rules and regulations.

Features, specifications and appearance are subject to change without notice. Music & Lights S.r.l. and all affiliated companies disclaim liability for any injury, damage, direct or indirect loss, consequential or economic loss or any other loss occasioned by the use of, inability to use or reliance on the information contained in this document.

Product user manual can be downloaded from the website [www.prolights.it](http://www.prolights.it) , or can be inquired to the official PROLIGHTS distributors of your territory ([https://www.prolights.it/sales\\_network.html](https://www.prolights.it/sales_network.html)).

Scanning the below **QR Code**, you will access the download area of the product page, where you can find a broad set of always updated technical documentation: specifications, user manual, technical drawings, photometrics, personalities, fixture firmware updates.

Visit the download area  
of the product page

# SAFETY INFORMATION

## WARNING!

- Please read carefully the instruction reported in this section before installing, powering, operating or servicing the product and observe the indications also for its future handling.

**This unit is not for household use, only professional applications.**

## Connection to mains supply

- The Connection to the mains supply must be carried out by a qualified electrical installer.
- Use only AC supplies 100-240V 50-60 Hz, the fixture must be electrically connected to ground (earth).
- Select the cable cross section in according with the maximum current draw of the product and the possible number of products connected at the same power line.
- The AC mains power distribution circuit must be equipped with magnetic+residual current circuit breaker protection.
- Do not connect it to a dimmer system; doing so may damage the product.

## Protection and Warning against electrical shock

- Do not remove any cover from the product, always disconnect the product from AC power before servicing.
- Ensure that the fixture is electrically connected to ground (earth). And use only a source of AC power that complies with local building and electrical codes and has both overload and ground-fault (earth-fault) protection.
- Before using the fixture, check that all power distribution equipment and cables are in perfect condition and rated for the current requirements of all connected devices.
- Isolate the fixture from power immediately if the power plug or any seal, cover, cable, or other components are damaged, defective, deformed or showing signs of overheating.
- Do not reapply power until repairs have been completed.
- Refer any service operation not described in this manual to PROLIGHTS Service team or an authorized PROLIGHTS service center.

## Installation

- Make sure that all visible parts of the product are in good visible condition before its use or installation.
- Make sure the point of anchorage is stable before positioning the projector.
- When suspending the fixture above ground level, secure it against failure of primary attachments by attaching a safety cable that is approved as a safety attachment for the weight of the fixture to the attachment point on the main frame of the product. In case the safety cable, enter in action, it needs to be replaced with a new one.
- Install the product only in well ventilated places.
- For non temporary installations, ensure that the fixture is securely fastened to a load-bearing surface with suitable corrosionresistant hardware.
- For a temporary installation with clamps, ensure that the quarter-turn fastener and/or screws are turned fully, and secured with a suitable safety cable.

## Minimum distance of illuminated objects

- The projector needs to be positioned so that the objects hit by the beam of light are at least 0.5 meters (1.64 ft) from the lens of the projector.

T<sub>a</sub> 45 °C

#### Max operating ambient temperature (Ta)

- Do not operate the fixture if the ambient temperature (Ta) exceeds 45 °C (113 °F).

T<sub>a</sub> -10 °C

#### Minimum operating ambient temperature (Ta)

- Do not operate the fixture if the ambient temperature (Ta) is below -10 °C (-14 °F).

#### Protection from burns and fire

- The exterior of the fixture becomes hot during use. Avoid contact by persons and materials.
- Ensure that there is free and unobstructed airflow around the fixture.
- Keep flammable materials well away from the fixture
- Do not expose the front glass to sunlight or any other strong light source from any angle. Lenses can focus the sun's rays inside the fixture, creating a potential fire hazard.
- Do not attempt to bypass thermostatic switches or fuses.

#### Indoor use

- This product is designed for indoor and dry environments.
- Do not use in wet location and do not expose the fixture to rain or moisture.
- Never use the fixture in places subject to vibrations or bumps.
- Make certain that no inflammable liquids, water or metal objects enter the fixture.
- Excessive dust, smoke fluid, and particle build up degrades performance, causes overheating and will damage the fixture.
- Damages caused by inadequate cleaning or maintenance are not covered by the product warranty.

T<sub>c</sub> 70 °C

#### Temperature of the external surface

- The surface of the fixture can reach up to 70 °C (159.8 °F) during operation. Avoid contact with people and materials.

#### Maintenance

- Warning! Disconnect the fixture from AC mains power and allow to cool for at least 10 minutes before handling.
- Only technicians who are authorized by PROLIGHTS or Authorised service partners are permitted to open the fixture.
- Users may carry out external cleaning, following the warnings and instructions provided, but any service operation not described in this manual must be referred to a qualified service technician.
- Important! Excessive dust, smoke fluid, and particle build up degrades performance, causes overheating and will damage the fixture. Damages caused by inadequate cleaning or maintenance is not covered by the product warranty.

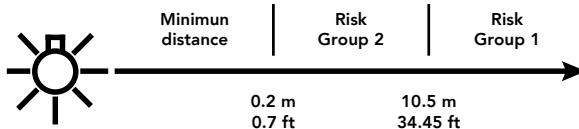

#### Photobiological safety

- This device emits potentially dangerous optical radiation and is identified in the category of Risk Group 2 according to EN 62471.

#### Do not stare at the operating light source

- Do not look directly at the LED source during operation. It can be harmful to the eyes and skin.
- During Installation, operation and maintenance, be prepared for the fixture to light and move suddenly when connected to power.
- The device should be positioned so that prolonged staring into the luminaire at a distance closer than 10.5 m (34.44 ft) is not expected.

#### Disposal

- This product is supplied in compliance with European Directive 2012/19/EU – Waste Electrical and Electronic Equipment (WEEE). To preserve the environment please dispose/ recycle this product at the end of its life according to the local regulation.

#### The products to which this manual refers comply with:

- 2014/35/EU - Safety of electrical equipment supplied at low voltage (LVD).
- 2014/30/EU - Electromagnetic Compatibility (EMC).
- 2011/65/EU - Restriction of the use of certain hazardous substances (RoHS).
- 2014/53/EU - Radio Equipment Directive (RED).

c US

- UL STD 1573 + CSA C22.2 No. 166 - Stage and Studio Luminaires and Connector Strips.

#### Other approvals

- The product meets the safety requirements of the certification procedures of the market in which it is placed and sold.

# 1 - PACKAGING

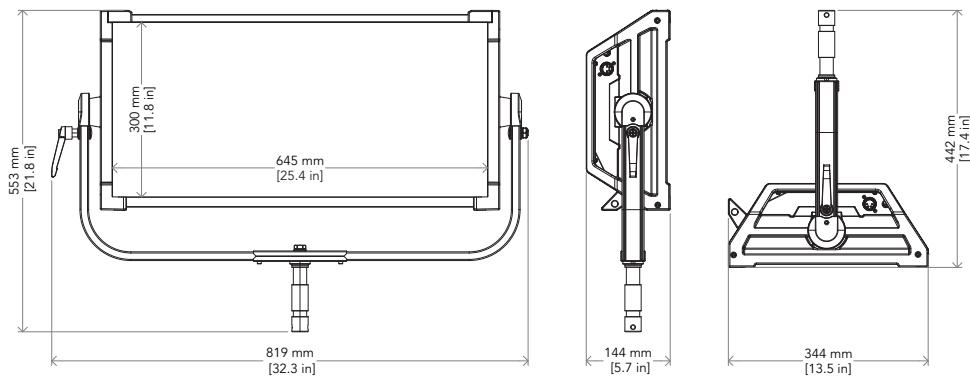

## PACKAGE CONTENT

- 1x ECLPANELTWC;
- 1x 1,5 meters power cable (SCHUKO plug - NEUTRIK POWERCON TRUE1 IP65);
- 1x EPTWCFILTERMD: front medium diffusion filter for ECLPANELTWC;
- 1x ECLFRSPG: spigot for PROLIGHTS Fresnel series;
- User manual.

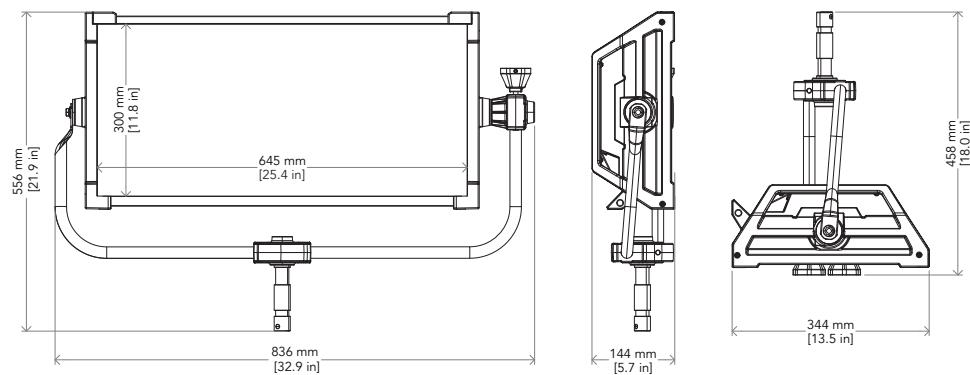

## OPTIONAL ACCESSORIES

- RSR0630A/B: steel security cable for hanging bodies, inox steel shackle, L=60 cm, silver/black;
- 9533FXWL03: ass. 3x2.5mm TH07 cable, SHUKO plug, MENAC3FXW socket, L.3m;
- 958225L03: 3x2.5mm TH07 Cable, 16A 3p PwCon MXW, 16A 3p PwCon FXW, L. 3m;
- FCLPANEL1U: flight case for 1 pc of ECLPANELTWC;
- C6002: slim aluminium clamp, 200 kg loading, 48-51 mm tubes, M10 bolt;
- C6040: aluminum clamp for 28mm spigot, 200kg load, 48-51mm tubes;
- EPTWCBAG1U: trolley bag for 1 pc of ECLPANELTWC;
- 9513FXWL03: ass. 3x2.5mm TH07 cable, 16A 3p 230V CEE plug, MENAC3FXW socket, L.3 m;
- TOUR53415L03BK: dmx cable HC5340. CANC5MXX XLR 5p->CANC5FXX XLR (f) 5p, L.3m;
- WSBBF1G5: blackBox F-1 G5 transmitter, 2,45GHz & 5.2/5,8 GHz, DMX/RDM, 512Ch;
- WSBBF1G6: blackBox F-1 G6 transrec, 512ch, 2.45GHz, DMX&RDM,Bluetooth,G3,G4,G4S, G5, CRMX;
- WSBBR51G5: blackBox R-512 G5 receiver 512Ch, 2.45GHz & 5.8GHz, DMX/RDM optional;
- WSBBR51G6: blackBox R-512 G6 receiver 512Ch, 2.45GHz,DMX&RDM,Bluetooth,G3,G4,G4S,G5,CRMX;
- FCLPANEL3U: flight case for 3 pcs of ECLPANELTWC;
- ECLPANELPOYO: pole operated aluminium yoke bracket for ECLPANELTWC;
- EPTWCFILTERINT: front intensified diffusion filter for ECLPANELTWC;
- EPTWCFILTERHD: front high diffusion filter (less output) for ECLPANELTWC;
- EPTWCFILTERLD: front low diffusion filter (more output) for ECLPANELTWC;
- EPTWCEC30: 30 degree egg crate for ECLPANELTWC;
- EPTWCEC60: 60 degree egg crate for ECLPANELTWC;
- EPTWCEC8C: 8 chamber egg crate for ECLPANELTWC;
- EPTWCBDR2: barn door with 4 directional flaps to adjust the light beam;
- EPTWCBD: barn door with 4 directional flaps to adjust the light beam;
- EPTWCSB21: snapBag 2x1 for ECLPANELTWC by DoP choice;
- EPTWCSG4SB2140: 40° SnapGrid for SnapBag, 2x1 for ECLPANELTWC by DoP choice;
- EPTWCSG2140: 40° SnapGrid, 2x1 for ECLPANELTWC by DoP choice;
- EPSRER: rabbit-Ears 2x1 Rectangular for ECLPANELTWC by DoP choice;
- EPSBRL3: snapbag Lantern 3' for Rabbit-Ears by DoP. Incl. Lantern, Backcovers, Carry Bag;
- EPSBRL3C4: cover for Snapbag Lantern 3' (EPSBRL3) by DoP choice; 4 sides, adj. with zipper;
- EPSBRM: snapBag Medium to be mounted on Rabbit Ears by DoP;
- EPSCGM40: SnapBag Medium to be mounted on Rabbit Ears by DoP;
- EPSBRO3: snapbag Octa 3' to be mounted on Rabbit-Ears by DoP;
- EPSGC3W40: 40° SnapGrid, to be mounted on Snap Bag Octa 3' (EPSBRO3);
- EPSBRO5: snapbag Octa 5' to be mounted on Rabbit-Ears by DoP;
- EPSGC5W40: 40° SnapGrid, to be mounted on Snap Bag Octa 5' (EPSBRO5);
- EPSBRO7: snapbag Octa 7' to be mounted on Rabbit-Ears by DoP.;
- EPSGC7W40: 40° SnapGrid, to be mounted on Snap Bag Octa 7' (EPSBRO7);
- EPSBCFNSM: diffusion MAGIC cloth for Snapbag 60x90cm (EPTWCSB21) by DoP choice;
- EPSBCFNSF: diffusion FULL Grid cloth for Snapbag 60x90cm (EPTWCSB21) by DoP choice;
- EPSBCFNSH: diffusion HALF Grid cloth for Snapbag 60x90cm (EPTWCSB21) by DoP choice;
- EPSBCFNSQ: diffusion QUARTER Grid cloth for Snapbag 60x90cm (EPTWCSB21) by DoP choice;
- EPSBCFNSQFM: diffusion cloth SET(1/4,1/1,MAGIC) for Snapbag 60x90cm (EPTWCSB21) by DoP choice;
- EPSBCFNSQHF: diffusion cloth SET (1/4, 1/2,1/1) for Snapbag 60x90cm (EPTWCSB21) by DoP choice;
- EPTWCLANT21: snapbag Lantern for ECLPANELTWC by DoP. Incl. Lantern, Backcovers, Carry Bag;
- SWIT500W2KIT: 24/48V 500W battery (>1.2hrs) KIT including 2\*PBH260S smart power batt.+st.adapt;
- UPBOX1U: firmware uploader kit, USB IN, 3pin XLR DMX OUT, USB OUT.

## 2 - TECHNICAL DRAWING

Weight: 15.3 kg - 33.73 lbs

Weight: 17.1kg - 36.70 lbs

Fig. 01

## 3 - INSTALLATION

### MOUNTING

Check that the supporting structure can safely bear the weight of all installed fixtures, clamps, cables, auxiliary equipment, etc. and complies with locally applicable regulations.

When suspending the fixture above ground level, secure it against failure of primary attachments by attaching a safety wire that is approved as a safety attachment for the weight of the fixture to an anchor point on the product main frame.

Do not use removable parts or weak anchors for secondary attachment.

Warning! When clamping the fixture to a truss or other structure at any angle, use clamps of half-coupler type. Do not use any type of clamp that does not completely encircle the structure when fastened.

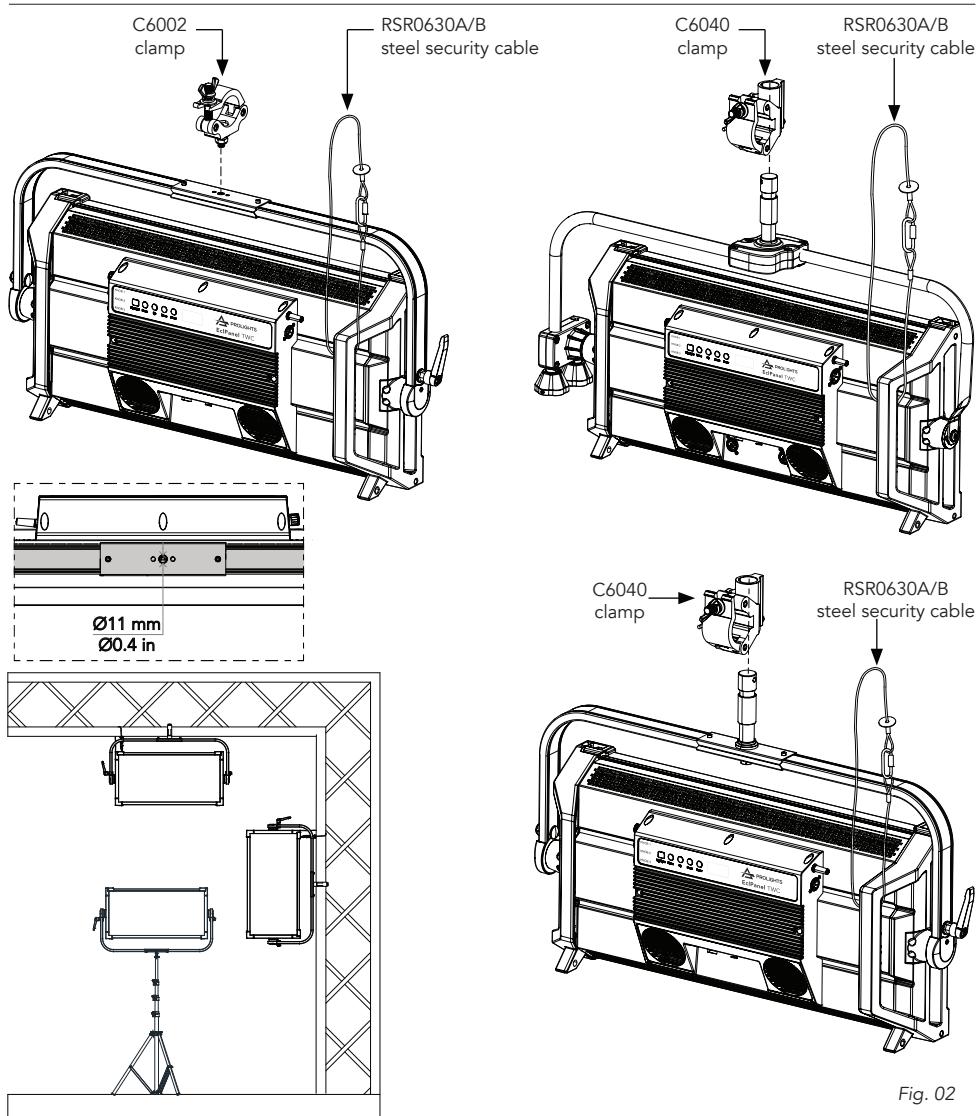

Fig. 02

## 4 - CONNECTION TO THE MAINS SUPPLY

WARNING: For protection from electric shock, the fixture must be earthed!

The product is equipped with auto-switching power supply that automatically adjusts to any 50-60Hz AC power source from 100-240 Volts.

If you need to install a power plug on the power cable to allow connection to power outlets, install a grounding-type (earthed) plug, following the plug manufacturer's instructions. If you have any doubts about proper installation, consult a qualified electrician.

The max power consumption is 460W.

Core (EU)	Core (US)	Connection	Plug terminal marking
Brown	Black	Live	L
Blue	White	Neutral	N
Yellow+green	Green	Earth	

## 5 - START UP

### CONNECT AND DISCONNECT POWER FROM THE PRODUCT

To apply and disconnect power to the product:

- Check that the product is installed and secured as indicated in the Safety Informations, and that personal safety will not be put at risk when the fixture lights up.
- Connect the power connector into the Mains input socket (100-240 VAC-50/60 Hz).
- The product is then ready for its operations and can be controlled through the available input signals on board.
- To disconnect power from the product, disconnect the Mains from the socket.
- In case you wish to run the product through an external battery, then connect the product to an external battery (24-36V) into the dedicated XLR4p socket; to disconnect power, disconnect the Battery from the socket.

## 6 - PRODUCT OVERVIEW

1. ANTENNA of Wireless DMX Receiver internal module.
2. USER INTERFACE with display and buttons for access to the control panel functions.
3. HIGHLIGHT button: turns the fixture temporary on for focusing without data signal.
4. ROTATORY KNOBS for product stand alone control operations.
5. TILT KNOB: for fixture tilt adjustment and fastening.
6. POWER IN: for connection to the Mains 100-240V~/50-60Hz.
7. MAIN FUSE HOLDER: replace a burnt-out fuse by one of the same type only (T6.3 AL 250V).
8. DMX IN (5-p XLR): 1 = GND, 2 = sign-, 3 = sign+, 4 N/C, 5 N/C.
9. DMX OUT (5-p XLR): 1 = GND, 2 = sign-, 3 = sign+, 4 N/C, 5 N/C.
10. POWER OUT: power output for connection of multiple units in series.
11. BATTERY IN (4-pole XLR): for battery within 24-36 V range, 1 = V -, 2 = N/C, 3 = N/C, 4 = V+.

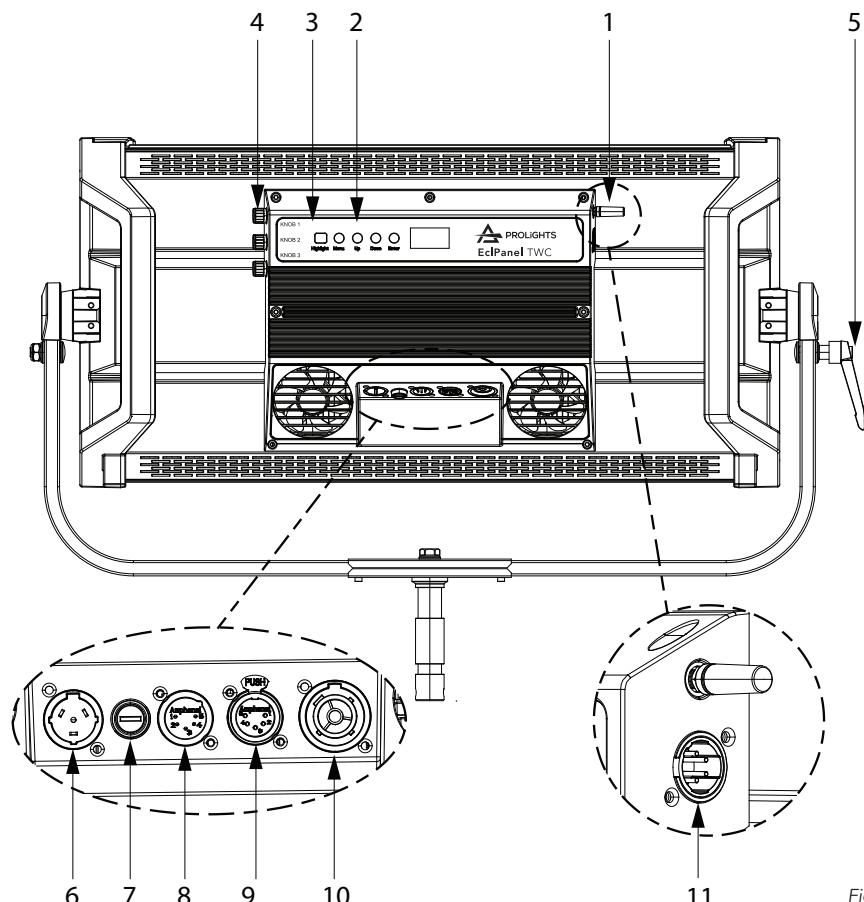

Fig. 03

## 7 - DMX CONNECTION

### CONNECTION OF THE CONTROL SIGNAL: DMX LINE

The product has XLR sockets for DMX input and output.

The default pin-out on both socket is as the following diagram:

**DMX - INPUT  
XLR plug**

**DMX - OUTPUT  
XLR socket**

Fig. 04

### INSTRUCTIONS FOR A RELIABLE DMX CONNECTION

Use shielded twisted-pair cable designed for RS-485 devices: standard microphone cable cannot transmit control data reliably over long runs. 24 AWG cable is suitable for runs up to 300 meters (1000 ft). Heavier gauge cable and/or an amplifier is recommended for longer runs.

To split the data link into branches, use splitter-amplifiers in the connection line.

Do not overload the link. Up to 32 devices may be connected on a serial link.

### CONNECTION DAISY CHAIN

Connect the DMX data output from the DMX source to the product DMX input (male connector XLR) socket.

Run the data link from the product XLR output (female connector XLR) socket to the DMX input of the next fixture.

Terminate the data link by connecting a 120 Ohm signal termination. If a splitter is used, terminate each branch of the link.

Install a DMX termination plug on the last fixture on the link.

### CONNECTION OF THE DMX LINE

DMX connection employs standard XLR connectors. Use shielded pair-twisted cables with  $120\Omega$  impedance and low capacity.

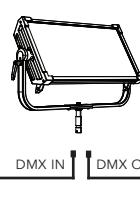

The following diagram shows the connection mode:

DMX Address: 33

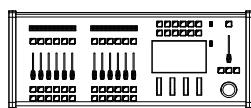

DMX Address: 48

DMX Address: 63

DMX Address: 78

.....

DMX512 Controller

Fig. 05 - Example 15 DMX channels configuration

## CONSTRUCTION OF THE DMX TERMINATION

The termination is prepared by soldering a  $120\Omega$  1/4 W resistor between pins 2 and 3 of the male XLR connector, as shown in figure.

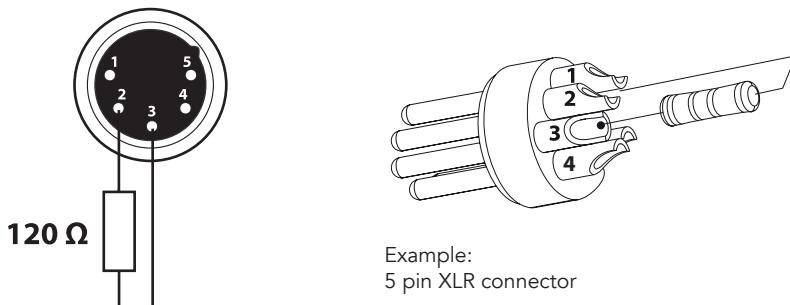

Fig. 06

## DMX ADDRESSING

In order to start controlling the product via DMX, the first step is to select a DMX address, also known as the start channel, this is the first channel used to receive instructions from a DMX controller. If you wish to control the product individually, it is necessary to assign a different starting address channel to each fixture.

The number of channels occupied from the product depends on the DMX mode selected, so always verify the DMX Mode in the MENU before start addressing.

If you assign two fixtures the same address, they will be executing the same behaviour. Selecting the same address to multiple fixtures can be useful for diagnostic purposes and symmetrical control.

DMX addressing is limited to make it impossible to set the DMX address so high that you are left without enough control channels for the product.

To set the fixture's DMX address:

1. Press MENU to open the main menu.
2. Reach the addressing menu, then select the DMX ADDRESS settings.
3. Select the address from 1 to 512 using the navigation arrows/buttons and confirm by pressing ENTER.
4. Press Menu to exit and return to the Home screen.

The product DMX address, as well as other possible user settings through the MENU, can also be set when the product is disconnected from the Main through the internal battery-backup. All that is needed is to press and hold the button ENTER to momentarily enable the display and enter in the settings. Once the required operations have been executed, the display will switch off again after few seconds of being inactive.

## DMX WIRELESS

The device is compatible with The WDMX and LumenRadio standards.

## OPERATION AS A WIRELESS TRANSMITTER

ECLPANELTWC can be used as wireless transmitter for transmitt at different wireless receivers DMX signal. To use ECLPANELTWC as wireless transmitter, please follow the procedure below:

1. Push MENU button until you show CONNECT on display, then press ENTER button to confirm.
2. Use UP/DOWN buttons for select Wireless, then press ENTER to confirm.
3. Push ENTER button on WDMX ON/OFF function and enable it to ON.
4. Select WDMX mode and set it on Transmitter (please note that WDMX mode will be available only if WDMX ON/OFF is set to ON).

5. Ensure that the receiver units are not connected to any other transmitter. Please refer to "Reset the receiver" paragraph.
6. Enable TX LINK to ON to link transmitter to receivers (please note that TX LINK will be available only if WDMX mode is set to Transmitter).
  - The transmitter scans for all unlinked receivers for a period of about 5 seconds.
  - If the connection fails, check the position of the receiver.
  - The wireless icon on the receiver display indicates the received signal strength.

### **Unlinking the transmitter**

Follow the procedure below to unlink the transmitter from all receivers connected with the unit.

1. Push MENU button until you show CONNECT on display, then press ENTER button to confirm.
2. Use UP/DOWN buttons for select Wireless, then press ENTER to confirm.
3. Enable TX UNLINK to ON 8 (please note that TX UNLINK will be available only if WDMX mode is set to Transmitter).
- All connected receivers will be unlinked.

### **DMX TO WDMX (TX)**

This function enable or disable the transmission through wireless of the DMX signal from the transmitter side to the receiver.

### **OPERATION AS A WIRELESS RECEIVER**

ECLPANELTWC can be used as wireless receiver connected to a wireless transmitter.

To use ECLPANELTWC as wireless receiver, please follow the procedure below:

1. Push MENU button until you show CONNECT on display, then press ENTER button to confirm.
2. Use UP/DOWN buttons for select Wireless, then press ENTER to confirm.
3. Push ENTER button on WDMX ON/OFF function and enable it to ON.
4. Select WDMX mode and set it on Receiver (please note that WDMX mode will be available only if WDMX ON/OFF is set to ON).
5. Enable RX RESET to ON to reset the receiver (please note that RX RESET will be available only if WDMX mode is set to Receiver).
6. On the transmitter, enable TX LINK to ON to link transmitter to the receivers.
7. If the connection is successful and DMX input is available the display on the receiver unit will shows the DMX address. If DMX signal is not available, the display will shows "No signal" but keeps the transmitter linked.
8. If the connection fails, check the position of the receiver.
9. The wireless icon on the receiver display indicates the received signal strength.

### **Reset the receiver**

Follow the procedure below to reset the receiver.

1. Push MENU button until you show CONNECT on display, then press ENTER button to confirm.
2. Use UP/DOWN buttons for select Wireless, then press ENTER to confirm.
3. Enable RX RESET to ON.
- The wireless icon on the receiver display indicates the received signal strength.

### **WDMX TO DMX (RX)**

This function enable or disable the retransmission of the wireless DMX signal received through the DMX port on the receiver side.

## 8 - CONTROL PANEL

The product has a display and buttons for access to the control panel functions.

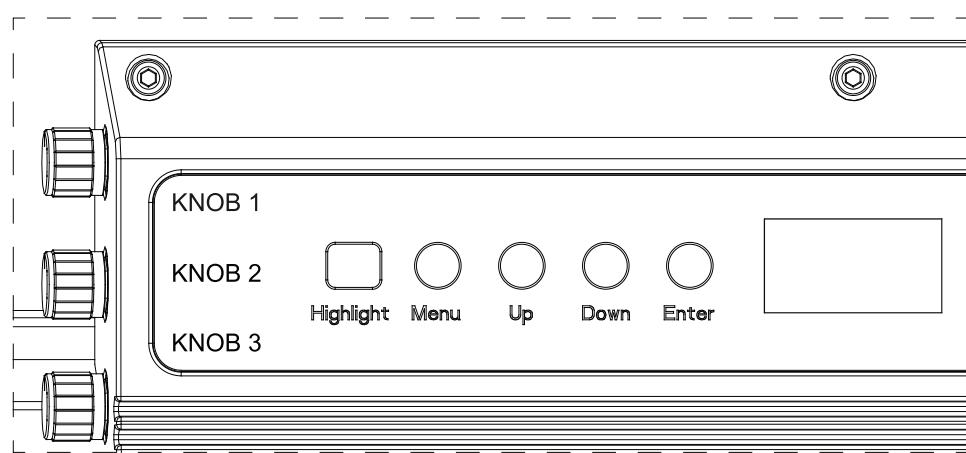

Fig. 07

### DISPLAY AND BUTTONS LAYOUT

- The product has a display and buttons for access to the control panel functions.
- HIGHLIGHT: Press and hold for three seconds to temporary turn ON the product at Full ON for user focusing operations.
- MENU: Used to access the menu tree or to return a previous menu window.
- UP: Browse upwards through the menu list and increases the numeric value displayed.
- DOWN: Browse downwards through the menu list and decreases the numeric value displayed.
- ENTER: Used to confirm the current menu or confirm the current function value or option within a menu.

### ROTATORY KNOB LAYOUT

The product is equipped with rotatory knobs for manual control of the product, those are enabled only in Stand Alone mode and they enable access to control certain attributes according to the selected STAND ALONE mode as indicated below:

MODE	ROTARY KNOB 1	ROTARY KNOB 2	ROTARY KNOB 3
EFFECTS	Dimmer (0 ÷ 255)	Effect	Speed (1 ÷ 100)
CCT	Dimmer (0 ÷ 255)	+/- Green (-25/+25)	Control temperature (CCT): 2800K ÷ 10000K
HSI	Dimmer (0 ÷ 255)	Colors (0 ÷ 255)	Saturation (SAT): 0 ÷ 255

## 9 - MENU STRUCTURE

The following chart describes the MENU tree of the product, the terms shown in **BOLD** indicate the default settings for Standard factory reload, the terms shown in **Underlined** indicate the default settings for Film factory reload.

MENU					
1	CONNECT	DMX Address	Value (001-512)		
		DMX Mode	Theater	1CH 2CH	Amber Shift On  Color <b>2800K</b> Temperature 3200K 3500K 4000K 4500K 5000K 5600K 6000K  Manual Color Red (000÷ <b>255</b> ) Green (000÷ <b>255</b> ) Blue (000÷ <b>255</b> ) White (000÷ <b>255</b> )
				4CH 5CH1 5CH2 6CH 10CH <b>15CH</b> 17CH 21CH	
			Tour	4CH 6CH 10CH 11CH 15CH	
			Pixel	1 2H 2V 4H 4V 8	
			Film	12CH <b>20CH</b> 17CH 33CH 65CH 129CH XY	
	Wireless	WDMX ON/OFF	On-Off		Enable/Disable the wireless card.
		WDMX mode	Transmitter <b>Receiver</b>		Choose whether to set the wireless card as Transmitter or Receiver. <u>WDMX mode is unlocked only if WDMX ON / OFF is ON.</u>
		TX link	On-Off		TX link unlock when the unit is set as a transmitter.
		TX unlink	On-Off		Disconnect the transmitter from all receivers. <u>TX unlink unlocks only if WDMX mode is on transmitter.</u>
		RX reset	On-Off		Total reset of the receiver. <u>RX reset unlocks only if WDMX mode is receiver.</u>
		DMX to WDMX (TX)	On-Off		Enable/Disable the transmission of the dmx from the transmitter to the receiver via wdmx.
		WDMX to DMX (RX)	On-Off		Enable/Disable the retransmission of the DMX from the receiver to the other units connected by cable to the receiver itself.

2	<b>SETUP</b>	Screen	Back Light	On <b>10 s</b> 20 s 30 s	Select the timing after that display will switch automatically off when unactive.
			Flip Display	No/Yes	Allows you to rotate the display by 180°.
			Key Lock	No/Yes	Lock the buttons on the control panel by a password. Press following combinations (password) in order to access to the user menu : UP, DOWN, UP, DOWN, ENTER.
			Display Value	Percentage Raw Data	Choose how to show datas on Stand Alone Modes. In percentage mode values will be shown as 0-100%. In Raw Data mode values will be shown as 0-255.
3	<b>ADVANCED</b>	Full On Mode	HB <b>Studio</b>		HB - High Brightness Mode, delivering the full output on every primary color Studio – Calibrated white output at 6000K,when all primary colors are set to full.
		Dimmer Curve	Linear S-Curve <b>Square Law</b> Inverse Square Law High Res@Low		
		Dimmer Mode	<b>Off</b> Dimmer 1 Dimmer 2 Dimmer 3		Dimmer Mode defines speed of the dimmer. Dimmer 1 is fastest, Dimmer 3 is slowest.
		Dimmer End	<b>Snap Off @ End</b> <b>Fade Off @ End</b>		Set Dimmer End behaviour. Snap Off will make fixture snap when dimming out to 0. Fade Off will make fixture fade when dimming out to 0. This selection affects only 004-000 DMX value behaviour.
		Color Calibration	White Balance	<b>Off</b>	Disable the White Calibration at full.
				Adjust Red Green Blue White	Manually adjust color calibration.
		<b>Calibrated</b>		Manufacturer calibration to grant performance and color consistency.	
		Led Frequency	600Hz <b>1200 Hz</b> 2000 Hz 4000 Hz 6000Hz <b>25kHz</b> 36kHz		Select PWM frequency.
4	<b>INFORMATION</b>	Fan Mode (Standard)	<b>Constant Output</b>	<b>Auto</b>	Select the product Fan mode for Standard mode. Constant Output: fixture will decrease immediately light output. Note: fixture will lower light output in case of Silent1, Silent2 and OFF.
			Dynamic Output	On Off Silent1 Silent2	Dynamic Output: fixture will have variable light output in order to keep a safe running temperature.
		Fan Mode (Film)	Auto On Off Silent1 Silent2 <b>Quiet1</b> Quiet2 Turbo		Select the product Fan mode for Film mode. Quiet1 and Quiet2 start to dim light down only when fixture gets near to the thermal protection threshold. Fan speeds are constant.
		Factory Reload	Standard Film	No/Yes	Reload fixture with Standard settings. Reload fixture with Film settings.
		Fixture Time	0÷9999		View informations about product operating lifetime.
		Disp Version	V2.8		
		Drv Version	V2.8		
		RDM UID	15D0022F****		View the UID of the product (RDM control).
		Calibration	MASTER/LED		View Calibration used.

5	<b>STAND ALONE</b>	Master/Slave	Master Master No Dmx Slave		Allow you to link and operating in sync multiple units without a DMX console. Choose a unit to perform as the Master. This unit must be the first unit in line; Set the successive units to be slave.

	Fixed Color	R G B W GB RB RG RGB RW GW BW RGW RBW GBW RGBW		Select of the following predefined color combination and its Dimmer value. After enabled this mode, the unit will be automatically assigned as Master.
	Manual Color	Red Green Blue White		User generated color preset by assigning values to each primary color attribute. After enabled this mode, the unit will be automatically assigned as Master

## STANDALONE BEHAVIOUR

Fixture will have two different behaviour between Standard or Film factory reload.

### STANDARD

If no Standalone mode selected, after unplugging DMX signal fixture will keep last DMX frame.

If a Standalone mode was previously selected, after unplugging DMX signal fixture will go into Standalone mode selected.

If fixture is booted up without DMX signal plugged in It will go into selected Standalone Mode.

### FILM

If no Standalone mode selected, after unplugging DMX signal fixture will keep last DMX frame.

If a Standalone mode was previously selected, after unplugging DMX signal fixture will keep last DMX frame, as soon as knobs are touched fixture will activate selected standalone.

If fixture is booted up without DMX signal plugged in It will stay in Blackout also if a Standalone mode was selected previously, as soon as knobs are touched fixture will activate selected standalone.

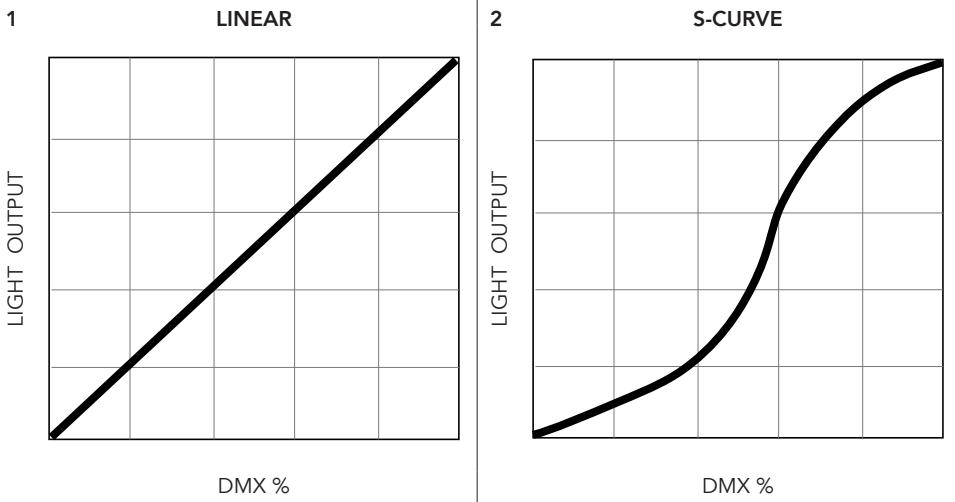

## 10 - SHORTCUT

KEYS	MODE	DESCRIPTION
UP + DOWN after power on	Flip Display	Directly flip display and knob order without enter inside menu.
DOWN + ENTER after power on	Enter Standalone Mode	Enter Stand Alone Mode when DMX signal is absent.
UP / DOWN using Stand Alone mode	Stand Alone mode	Scroll through different Stand Alone modes.
ENTER using Stand Alone mode	Stand Alone mode	Scroll through different parameters of the selected mode.
ENTER + UP then power on	Bootloader	Force firmware upgrade.

## 11 - DIMMER CURVES

Five dimming modes are available:

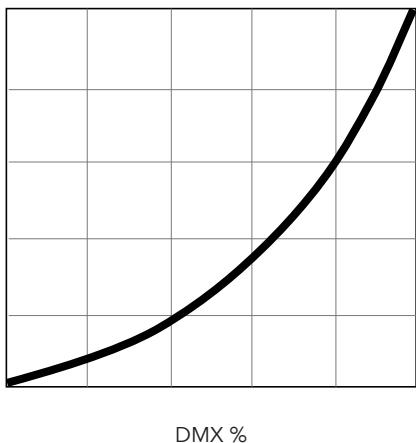

1. **LINEAR** - The increase in light intensity appears to be linear as DMX value is increased.
2. **S-CURVE** - Light intensity control is finer at low levels and high levels and coarser at medium levels.
3. **SQUARE LAW** - Light intensity control is finer at low levels and coarser at high levels.
4. **INVERSE SQUARE LAW** - Light intensity control is coarser at low levels and finer at high levels.
5. **HIGHRES@LOW** - Very Fine control at low light intensity and coarser at medium and high levels.

## 12 - RDM FUNCTIONS

The product can communicate using RDM (Remote Device Management) protocol over a DMX512 Networks.

RDM is a bi-directional communications protocol for use in DMX512 control systems, it is the open standard for DMX512 device configuration and status monitoring.

The RDM protocol allows data packets to be inserted into a DMX512 data stream without affecting existing non-RDM equipment. It allows a console or dedicated RDM controller to send commands to and receive messages from specific fixtures.

The PIDs in the following tables are supported in the product.

PARAMETER	PID	GET	SET

## 14 - ACCESSORIES INSTALLATION

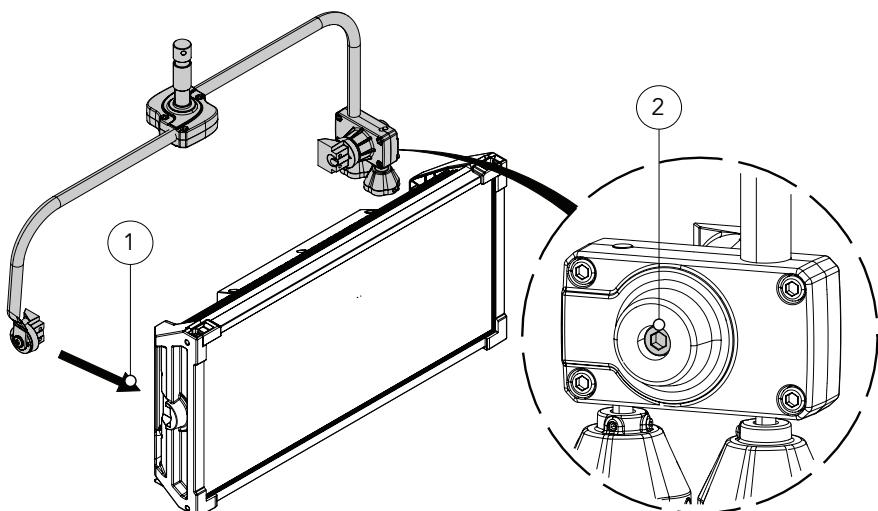

### THE POLE OPERATED YOKE (CODE ECLPANELPOYO - OPTIONAL)

1

Loosen and remove the four M5 screws (1). Then remove the bracket (2).

2

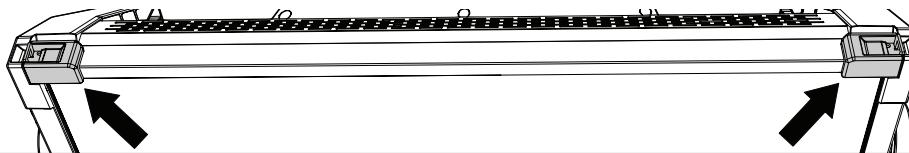

Mount the Pole Operated bracket Yoke (1) and tighten the four M5 screws removed earlier (point 1 of the image above). Then tighten the M8 screw (2).

NOTE: to adjust the holding torque of the clutch system of the TILT movement, please tighten the indicated M8 screw (2) with 6 mm allen key.

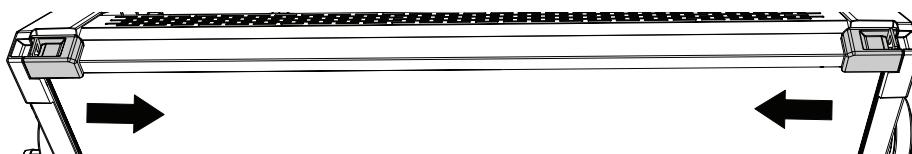

Fig. 08

## RIGID EGG CRATES (CODES EPTWCEC4C, EPTWCEC30, EPTWCEC60 - OPTIONAL)

1

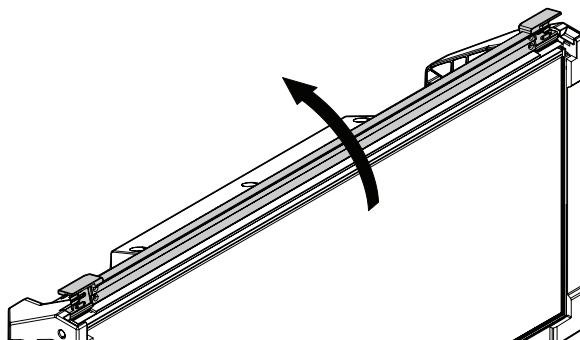

2

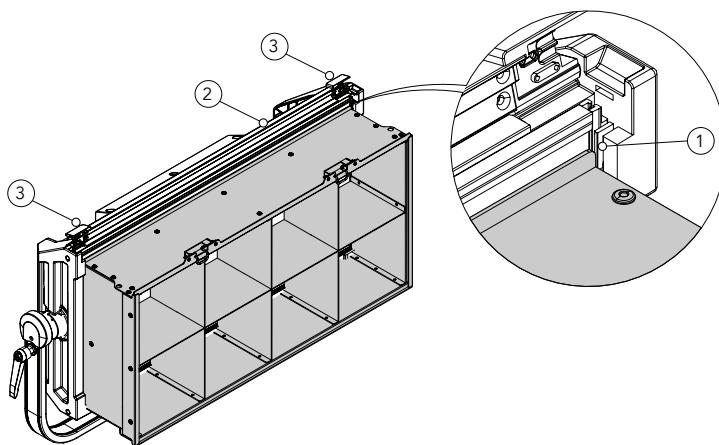

Slide the tabs placed on the top (1), inward the product (2).

3

Open the holder plate by turning it upwards (3).

4

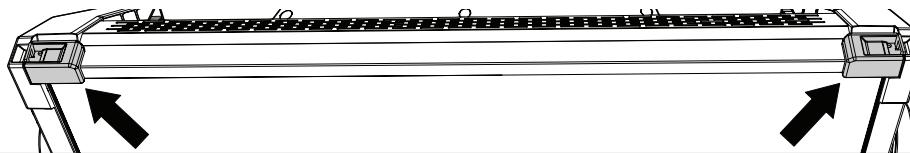

Insert the egg crate, inside the track guides (1). Then close the plate (2) and re-position the tabs outwards (3).

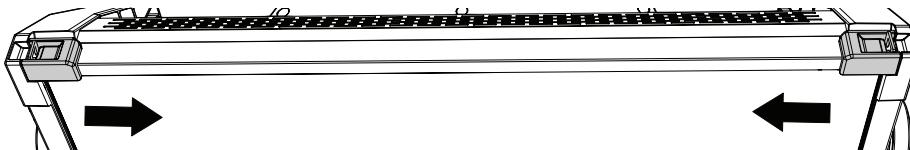

Fig. 09

**DIFFUSION FILTERS (CODES EPTWCFILTERHD, EPTWCFILTERMD, EPTWCFILTERLD - OPTIONAL)**

**1**

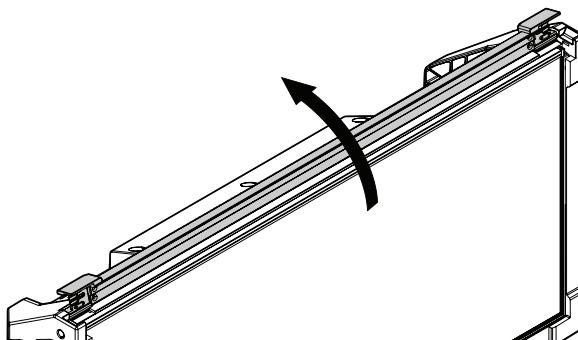

**2**

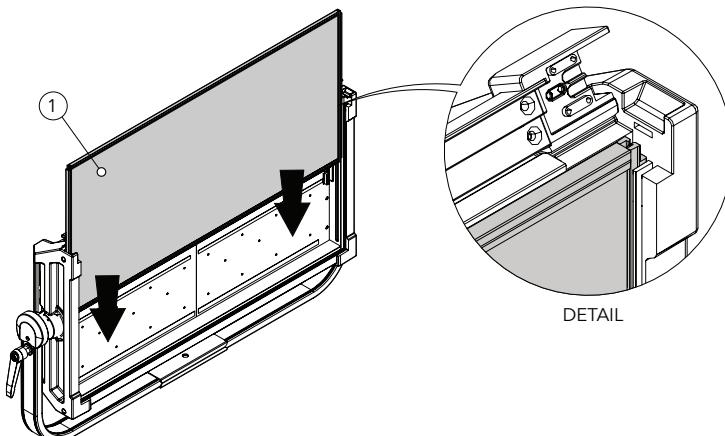

Slide the tabs placed on the top, inward the product.

**3**

Open the holder plate by turning it upwards (3).

**4**

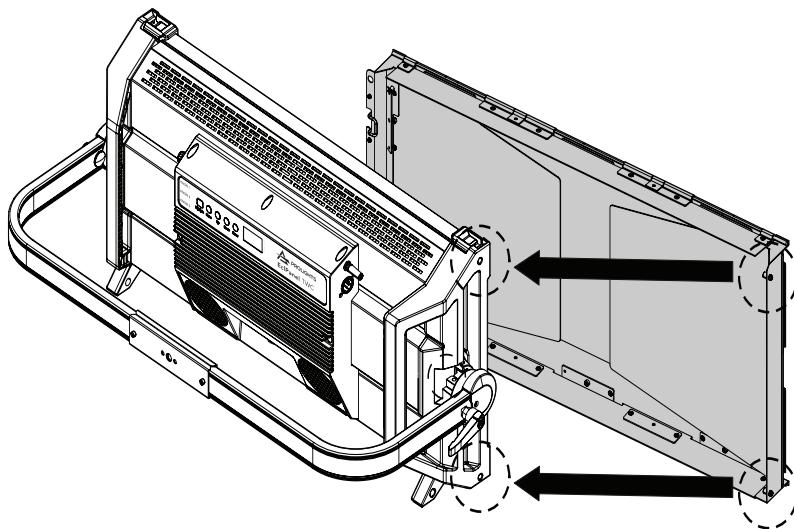

Insert the diffuser filter, inside the track guides (1). Then close the plate and re-position the tabs outwards.

Fig. 10

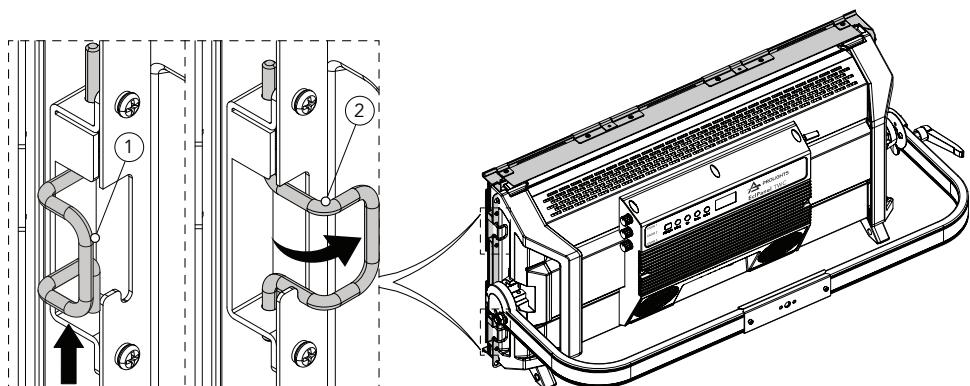

## BARN DOOR (CODE EPTWCBDR2 - OPTIONAL)

1

Insert the two positioning and fixing pins on the hardware into the holes provided on the left side edge of the product.

2

Hook the 2 clips (1) on the right edges (2), by rotating the head of the pin towards the body of the product. Then adjust the angle of the four leafs to focus the beam.

NOTE: To remove the accessory, reverse the procedure.

Fig.11

# 15 - MAINTENANCE

## MAINTENANCE AND CLEANING THE PRODUCT

WARNING: Disconnect from the mains before starting any maintenance work

It is recommended to clean the front at regular intervals, from impurities caused by dust, smoke, or other particles to ensure that the light is radiated at maximum brightness.

- For cleaning, disconnect the main plug from the socket. Use a soft, clean cloth moistened with a mild detergent. Then carefully wipe the part dry. For cleaning other housing parts use only a soft, clean cloth. Never use a liquid, it might penetrate the unit and cause damage to it.
- The user must clean the product periodically to maintain optimum performance and cooling. The user may also upload firmware (product software) to the fixture via the DMX signal input port or USB port using firmware and instructions from PROLIGHTS.
- The frequency of such maintenance operations is to be performed according to various factors, such as the amount of the use and the condition of the installation environment (air humidity, presence of dust, salinity, etc.). It is recommended that the product is subject to annual service by a qualified technician for special maintenance involving at least the following procedures:
- General cleaning of internal parts.
- Restoring lubrication of all parts subject to friction, using lubricants specifically supplied by PROLIGHTS.
- General visual check of the internal components, cabling, mechanical parts, etc.
- Electrical, photometric and functional checks; eventual repairs.
- Cleaning the lenses. Only use neutral soap and water to clean the lenses, then dry it carefully with a soft, non-abrasive cloth.

WARNING: the use of alcohol or any other detergent could damage the lenses.

- All other service operations on the product must be carried out by PROLIGHTS, its approved service agents or trained and qualified personnel.
- It is PROLIGHTS policy to apply the strictest possible calibration procedures and use the best quality materials available to ensure optimum performance and the longest possible component lifetimes. However, optical components are subject to wear and tear over the life of the product, resulting in gradual changes in colours over many thousands of hours of use. The extent of wear and tear depends heavily on operating conditions and environment, so it is impossible to specify precisely whether and to what extent performance will be affected. However, you may eventually need to replace optical components if their characteristics are affected by wear and tear after an extended period of use and if you require fixtures to perform within very precise optical and colour parameters.
- Do not apply filters, lenses or other materials on lenses or other optical components. Use only accessories approved by PROLIGHTS.

## REPLACING THE FUSE

WARNING: Before replacing the fuse, unplug the product from the mains.

- Remove the old fuse from the housing with a suitable screwdriver (anticlockwise) and replace it with one of the same type and of the same classification (T6.3 AL 250V).

## VISUAL CHECK OF PRODUCT HOUSING

- The parts of the product cover/housing should be checked for eventual damages and breaking start at least every two months. In addition, especially the parts of the front lens holder have to be checked mechanically (by means of movement by the part) if it is firmly fastened to the fixture. If hint of a crack is found on some plastic part, do not use the product until the damaged part will be replaced.
- Cracks or another damages of the cover/housing parts can be caused by the product transportation or manipulation and also ageing process may influence materials.
- This checking is necessary for both fixed installations and preparing product for renting. Any free moving parts inside of the product, cracked cover/housing or any part of front lens not sitting properly in place need to be immediately replaced.

## TROUBLESHOOTING

Problems	Possible causes	Checks and remedies
Product doesn't power ON	<ul style="list-style-type: none"> <li>• No power to the product.</li> <li>• Fuse blown or internal fault.</li> </ul>	<ul style="list-style-type: none"> <li>• Check that power is switched ON and cables are plugged in.</li> <li>• Check if the Fuse is intact and eventually replace it if necessary.</li> <li>• Contact the PROLIGHTS Service or authorized service partner. Do not remove parts and/or covers, or carry out any repairs or service that are not described in this Safety and User Manual unless you have both authorization from PROLIGHTS and the service documentation.</li> </ul>
Product reset correctly but does not respond correctly to the controller.	<ul style="list-style-type: none"> <li>• Bad signal connection.</li> <li>• Signal connection not terminated.</li> <li>• Incorrect addressing of the product.</li> <li>• One of the product is defective and is corrupting the signal transmission on the signal line.</li> </ul>	<ul style="list-style-type: none"> <li>• Inspect connections and cables. Fix eventual bad connections. Repair or replace damaged cables.</li> <li>• Insert DMX termination plug in signal output socket of the last product on the signal line.</li> <li>• Check the product address and control settings.</li> <li>• Unplug the XLR in and out connectors and connect them directly together to bypass one product at a time until normal operation is regained. Once found the error, have that fixture serviced by a qualified technician.</li> </ul>
Timeout error after fixture reset.	<ul style="list-style-type: none"> <li>• One or more hardware components requires mechanical adjustments.</li> </ul>	<ul style="list-style-type: none"> <li>• Check product stored error messages for more information.
