

SmallRig

Cold Shoe Extension

Operating Instruction

SmallRig Cold Shoe Extension 2879 is designed to hold accessories on the side of your rig when using cameras. The cold shoe mount maintains access to camera buttons after mounting a microphone or light. It secures to cages and plates with two captive 1/4"-20 screws to prevent it from losing. The cold shoe features a stopper edge in one end to prevent your accessory from suddenly sliding out.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.

In the Box

Cold Shoe Mount	× 1	Allen Wrench	× 1
Guarantee Card	× 1
