

SmallRig

Bottom Mount Plate **(for Sony Alpha 7R V / Alpha 7 IV)**

Operating Instruction

SmallRig Baseplate for Sony Alpha 7R V / Alpha 7 IV 3666 aims to improve grip experience and enable tripod and handheld shooting while protecting the bottom of the camera. It attaches to the bottom of the camera via a 1/4" -20 screw and locating pin, with features built-in silicone pad to prevent scratches and twisting. There is a spindle spanner at the battery door which fits camera curve and leave room for little finger for comfortable grip; embedded select genuine leather in the baseplate integrates into camera body. 1/4"-20 threaded holes and cold shoes at the bottom support mini tripods and microphones. Besides, the Arca compatible baseplate allows quick switching between tripod, stabilizer (DJI RS 2 / RSC 2 / RS 3 / RS 3 Pro) and handheld shooting. Accessible built-in magnetic spanner facilitates disassembly and assembly.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
