JOBO Processing Tanks & Drums

JOBO

Film Tanks and Film Drums

JOBO has three series of film Tanks/Drums

1. The 1500 series film Tanks system designed for 35mm, 110, 120/220 roll films, and can be used for inversion processing or with a JOB0 Processor.
2. The 2500 film Tank system. These can process 35mm, 120/220 roll film and sheet film, they are designed for processor use only. The unique design of the 2500 system will give optimum processing results of 120/220 film.
3. Expert film Drums. Provide most even processing of large format sheet film possible. Sheets are loaded into an individual cylinder inside the drum.

There's no need for covers, film holders, or retaining clips, so processing covers the entire surface of the film. Prints can also be processed in the Expert Drums.

1500 MODULAR FILM TANK SYSTEM

all 1500 series Tanks require a 1504 magnet when used with a processor, or a 1505 cog when using the lift.
